Poland
- **CENTRE FOR ADVANCEMENT OF RESEARCH AND DEVELOPMENT IN EDUCATIONAL TECHNOLOGY LTD-CARDET**  
Cyprus
- **RIGHTCHALLENGE**  
Portugal

### ABOUT THE PROJECT

**The aim of the project** is supporting the uptake of innovative approaches and digital technologies for teaching and learning.

eSMART will design and produce a bespoke, targeted **entrepreneurship curriculum for young digital natives** embarking on a career in the CCI sector as Web 4.0 entrepreneurs.

This project will **also provide essential in-service training for VET tutors** to ensure that they are knowledgeable about the symbiotic Internet and its potential and more importantly, **build their pedagogic and digital skills** to help them harness the potential of online learning to deliver a high-quality VET service in the current Covid-19 context where traditional institution-based provision is no longer viable.

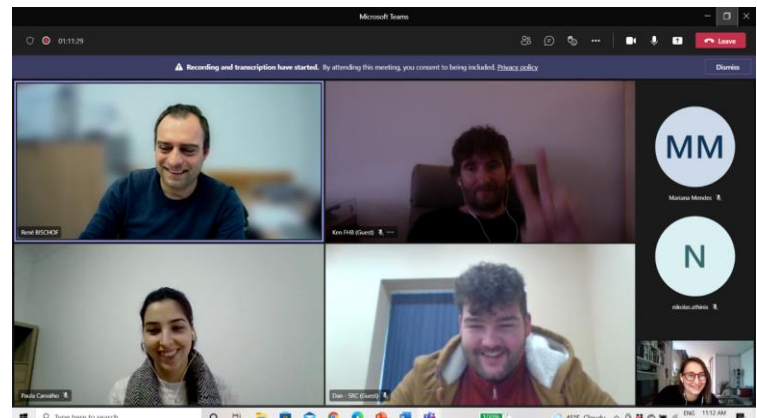

## PROJECT MEETINGS

Our productive project meetings were held on 25<sup>th</sup> of May 2021 and 15<sup>th</sup> of December 2021. Due to the situation with the pandemic of COVID 19, we had to hold our meetings online.

At the first meeting all partners presented their organizations, and the coordinator presented the project development plan including deadlines of tasks and division of work between the partners.

On second meeting the progress of the project activities was reviewed, and partners have agreed to all the upcoming activities and events.

## PARTNERS

## WHAT IS NEXT?

All the partners are currently working on the In-Service Training Programme to build pedagogic and digital skills of VET tutors.

Also, by summer of 2022 partners will produce a Compendium of Entrepreneurship eSMART EduZines and Interactive Infographics that will bring learning opportunities to young digital natives on their smartphones.
